With the rapid development of artificial intelligence, AI tools have become increasingly common in academic learning and research. As these technologies continue to influence the way students study and write, it is necessary to critically reflect on both their benefits and limitations.

AI played an important role in our project, but I think it should be seen mainly as an assistant, and can not replace for our. In this report, AI helped us find useful information, organize the structure, generate the overall outline and then improve the language skills of our writing. It saved us a lot of time, especially when we needed to collect ideas from different sources and make them clear and easy to understand.

However, AI is only a tool. It can give us helpful suggestions, but it can not think for us. Some of the content made by AI may look correct at first, but it still needs us to check carefully. This is why critical thinking is very important. We should ask ourselves: Is this information true? Is it suitable for our topic? Does it really make sense? Can we trust the source behind it? Without these questions, we may use wrong or weak information in our work.

From this experience, I learned that AI is useful for searching information and helping us organize our thoughts, but the final decision should always be made by us. We should read, compare, and judge the content before using it. In this way, AI can help us work faster and better, while our own thinking makes the work more accurate and meaningful.

In short, AI is a good helper, but not the main thinker. It can support our learning, but it cannot replace our responsibility to understand, analyze, and judge. As a first-year university student, I believe learning how to use AI wisely is an important skill for the

Nowadays, AI has become a common auxiliary tool in academic study. During the completion of this academic report on China's independent R&D, our group mainly used AI to collect relevant materials and check grammatical errors, which made me form a clear understanding of its functions and limitations.

AI greatly improved our work efficiency. It quickly searched and sorted out literature, industry cases and data related to the topic, and accurately spotted grammar mistakes and improper expressions in English writing, saving us much time on trivial work.

Nevertheless, AI has obvious shortcomings. It fails to grasp the core ideas of academic research and cannot conduct in-depth analysis on the technology's development difficulties and breakthroughs. What's more, it is unable to think independently or judge the authority of information. Fundamentally, AI is just a tool and can never replace human thinking, logical reasoning and original analysis.

The essence of academic writing lies in human independent exploration. In future study, I will use AI properly for material collection and grammar revision. Meanwhile, I will stick to independent thinking, finish core analysis and viewpoint creation on my own, and keep the originality and academic rigor of assignments.

知网个人查重服务报告单(简洁)

报告编号:BC2026061421194841798241 68　　检测时间:2026-06-14 21:19:48

篇名：**BYD Blade Battery: Overcoming U.S. EV Battery Supply Chain Restrictions**

作者：莫天皓;韦宇阳

检测类型：课程作业(本科)

比对截止日期：2026-06-14

检测结果

去除本人文献复制比：0%　　去除引用文献复制比：0%　　总文字复制比：0%

单篇最大文字复制比：0%

重复字符数：[0]　　单篇最大重复字符数：[0]　　总字符数：[39208]

0%(0)	0%(0)	中英文摘要等（总1990字）
0%(0)	0%(0)	Introduction_第1部分（总16699字）
0%(0)	0%(0)	Introduction_第2部分（总14905字）
0%(0)	0%(0)	Conclusion（总5614字）

1. 中英文摘要等　　总字符数：1990

相似文献列表

去除本人文献复制比：0%(0)　　去除引用文献复制比：0%(0)　　文字复制比：0%(0)

2. Introduction_第1部分　　总字符数：16699

相似文献列表

去除本人文献复制比：0%(0)　　去除引用文献复制比：0%(0)　　文字复制比：0%(0)

3. Introduction_第2部分　　总字符数：14905

相似文献列表

去除本人文献复制比：0%(0)　　去除引用文献复制比：0%(0)　　文字复制比：0%(0)

4. Conclusion　　总字符数：5614

相似文献列表

去除本人文献复制比：0%(0)　　去除引用文献复制比：0%(0)　　文字复制比：0%(0)

说明：1.总文字复制比:被检测文献总重复字符数在总字符数中所占的比例

2.去除引用文献复制比:去除系统识别为引用的文献后,计算出来的重合字符数在总字符数中所占的比例

3.去除本人文献复制比:去除系统识别为作者本人其他文献后,计算出来的重合字符数在总字符数中所占的比例

4.单篇最大文字复制比:被检测文献与所有相似文献比对后,重合字符数占总字符数比例最大的那一篇文献的文字复制比

5.复制比按照“四舍五入”规则,保留1位小数;若您的文献经查重检测，复制比结果为0，表示未发现重复内容，或可能存在的个别重复内容较少不足以作为判断依据

6.红色文字表示文字复制部分;绿色文字表示引用部分(包括系统自动识别为引用的部分);棕灰色文字表示系统依据作者
